

L8124A/C And L8148A Aquastat® Relays

Honeywell

Built to last. Meet all your immersion-type hydronic controller needs for years to come with the Honeywell L8124A/C and L8148A Aquastat® relays. For high-limit, low-limit and circulator control that maintains boiler temperatures efficiently and effectively, the reliable L8124A/C and L8148A relays have you covered without the need to stock dozens of models.

L8124A/C And L8148A Aquastat® Relays

Both the L8124A/C and L8148A Aquastat relays are built and packaged to help ease stocking and service situations. With compatibility for nearly every situation, standard wiring and handy cross-reference information, replacement of Honeywell and competitive models is a snap. Like all Honeywell Tradeline Aquastats, these models feature a heat-conductive compound for better bulb response in oversized wells.

L8124A/C

Use the Honeywell L8124A/C Aquastat Relay with forced hydronic heating systems that include domestic hot water service. The L8124A/C mounts directly on the boiler — vertically or horizontally — and provides high-limit, low-limit and circulator control. A diaphragm powerhead responds to changes in the boiler water to maintain the proper temperature.

L8148A

The L8148A Aquastat Relay combines high-limit protection with switching relay control of burner and circulator motors. The high-limit dial stop is factory-set at the end of the high-limit scale and can be easily adjusted to meet your application. The L8148A includes a transformer to provide power for the low-voltage control circuit, and can be mounted both vertically and horizontally.

Reduce Your Inventory

With Honeywell L8124A/C and L8148A Aquastat relays, you're ready for just about any immersion-type hydronic situation. Whether you're working on a new installation or modernizing a boiler with a replacement, count on Honeywell L8124A/C and L8148A relays to have you covered.
