Retrofit Existing Halsey Taylor HAC models to Bottle Filling stations - See below.

Convert HAC Models into Drinking & Bottle Filling Units!

Retrofit your existing "Halsey Taylor" 115V HAC model water coolers into drinking and water bottle filling stations! Supplied stainless steel basin to ensure easy installation.

- Sensor-activated bottle filling station delivers 1.5 gallons of water per minute.
- Bottle filler equipped with 20-second automatic shut-off timer.
- Visually displays the count of 20 oz. plastic bottles saved from landfills!
- Re-use your existing water bubbler to maintain the existing drinking fountain function.

Model	Description	Chilling Capacity	Watts, Voltage	Ship Lbs.	Order No.
HTHB-HAC-RF	Retrofit for existing HAC model coolers operating at 115 volts.	Based on existing unit	120 watts 115V	32.0	HC1030E

Water filters last approximately one year before needing replacement.

Elkay Water Cooler and Bottle Filler

- Easy touch front- and side-push bar activation. Beautifully curved design!
- Cooler panels are a light gray granite color, impact resistant platinum vinyl finish.
