

Boiler Feed End Suction Centrifugal Pumps

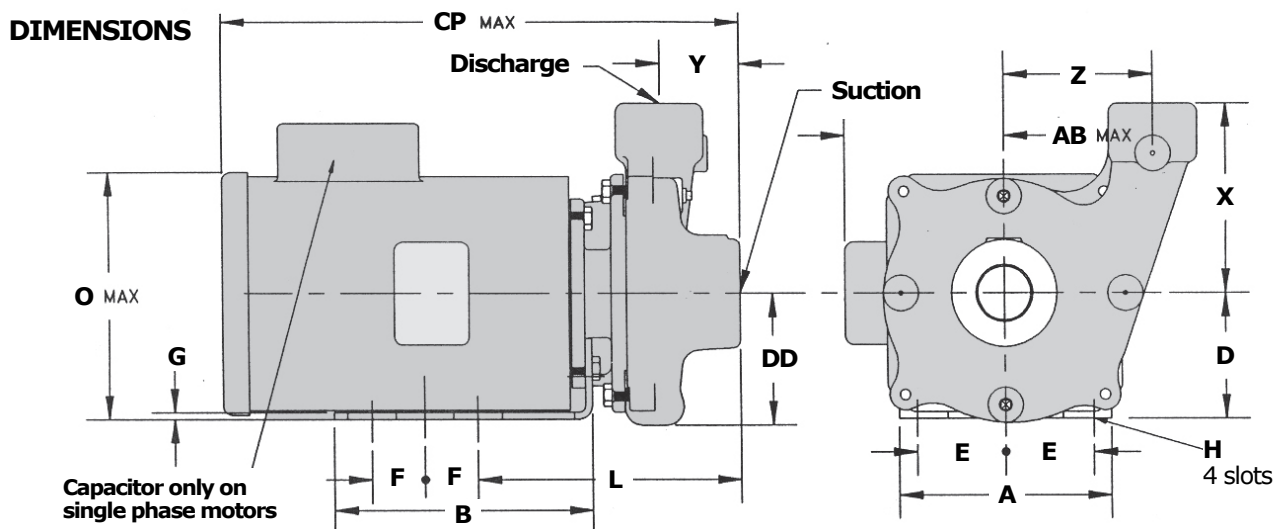

MEPCO brand End-Suction Centrifugal Pumps

These **MEPCO Model R5** brand close-coupled, end-suction, top discharge pumps are often used in boiler feed applications: These pumps receive the condensate from the tank and send it back to the boiler.

- The discharge connection can be positioned top, bottom or sides.
- Mechanical seal rated to 225° F.
- Maximum pump working pressure @ 175 psig.
- 3500 rpm, 56J frame motors, single or three phase voltage

Model	Pump H.P.	Discharge Pipe Size	Suction Pipe Size	Voltage Phase	Discharge Pressure, PSI	Order No.
R5-1	1/3	1"	1 1/4"	115/230, 1 phase	20	DK1495
R5-1	1/2			115/230, 1 phase	25	DK1500
R5-1				208-230/460, 3 phase	25	DK1505
R5-1	3/4			115/230, 1 phase	40	DK1510
R5-1		208-230/460, 3 phase	40	DK1515		
R5-1 1/4	1	1 1/4"	1 1/2"	115/230, 1 phase	50	DK1517
R5-1 1/4				208-230/460, 3 phase	50	DK1518
R5-1 1/4	1-1/2			115/230, 1 phase	60	DK1520
R5-1 1/4				208-230/460, 3 phase	60	DK1525
