

Fiberglass Pipe Insulation & Accessories

Micro-Lok or Knauf premium quality fiberglass pipe insulation is great for insulating your steam pipe lines:

- Peel-off, self-sealing lap means quick & easy installation.
- Clam Shell "split" down center - Easily goes over piping.
- 1" thickness, insulates to at least 800° F.
- Order the ASJ/SSL fiberglass pipe insulation tape to connect and secure the ends of the pipe insulation.
- Outside cover is white Kraft paper, bonded to aluminum foil with fiberglass yarn. Sold in 3 foot sections.
- Order the fitting insulation covers below.

Fiberglass Pipe Insulation

For Steam Heat Piping up to 800° F.

ASJ/SSL fiberglass pipe insulation tape: secures ends of fiberglass insulation. 3" wide x 150 feet.				TF1005
Childers CP-11 protective coating for all thermal insulations both indoors and out. White-colored. One gallon pail. Applies with brush.				BL1007

Fiberglass Insulation Pipe Fitting Covers

Includes Fiberglass Blanket with PVC Fitting Cover

The Zeston PVC fitting covers are used around the fittings —Tees and Elbows — on your insulated pipe lines. Order Z-tape to secure the fitting covers.

- First, you order the needed fiberglass pipe insulation above.
- Next, determine the number and pipe sizes of tees and elbows that you need to be insulated.
- Finally, go to the ordering table below and select the correct pipe sizes.

The PVC fitting covers come with a pre-cut fiberglass blanket that fits around the specific size fitting you will be covering. The pre-cut PVC fitting cover is then wrapped around the pre-cut fiberglass blanket and secured with the high temperature Z-tape (ordered separately from the table below).
